RIVERVISION DESIGN FEATURES

On Tuesday, March 2nd a second public hearing was held on the joint riverfront development project between Rock Island and Davenport, known as **RiverVision**. The Riverfront design specialists working with the two communities, Hargreaves Associates, presented four designs to participants.

The most recent design option being considered along the Rock Island riverfront includes a green park, transient boat dock, river overlook, urban promenade, and several piers. New housing and commercial development is also being considered on the Rock Island side.

Proposed developments for the Davenport side also include piers and a boat dock in addition to an observation spire, amphitheater, skate park, farmers / public market, green rooms, and additional commercial and housing development.

A water taxi that would service both sides of the river is also proposed as a way to further connection the two communities.
