Qualified Consultant sought for Lock & Dam Lighting Project

Rock Island is moving forward with implementing the [RiverVision Plan](#) by [seeking proposals](#) from qualified consultants who can assist with designing the lighting of Lock and Dam 15. The concept is to highlight the structure's architecture and features, without compromising river traffic safety. This was one of the key joint elements of the RiverVision Plan that was approved by Rock Island and Davenport last year.

There is \$60,000 available to plan and install the lighting, with \$40,000 coming from a Riverboat Development Authority grant and the balance being shared equally by the Cities of Davenport and Rock Island, Davenport One and the Development Association of Rock Island.

Anyone interested in this project should contact Alan Carmen, Planning and Redevelopment Administrator, at 309/732-2900 or carmen.alan@rigov.org.
